

Valid Parentheses 4

Given a string s containing just the characters '(', ')', '{', '}', '[', ']' and '^', determine if the input string is valid.

An input string is valid if:

- Open brackets must be closed by the same type of brackets.
- Open brackets must be closed in the correct order.

() () ()

$\overbrace{\{ \overbrace{[] } \} }^{\vee} \rightarrow \text{yes.}$

$\hookrightarrow \downarrow \{ \} \rightarrow \text{false.}$

{ { } } $\rightarrow \text{true.}$

solution.

{ { [] ()) } } $\rightarrow \text{ans=?}$

19 // }else{
20 //     System.out.println(-1);
21 // }
22
23 System.out.println(hm.getOrDefault(key, -1));
24
```

Word Meaning

- If $N=1$, take **word** and **meaning** as input from user and **add** it to the dictionary.

→ • If $N=2$, take a **word** as input from the user and print its meaning, if the word is not found print -1.

- If $N=3$, take a word as input from the user and delete it from the dictionary.

- If $N=4$, **Close** the dictionary(**Exit** the program).
